REPLACEMENT SOLENOID KIT'S FOR GAS VALVES Part Numbers 161109 and 161122

Suburban Direct Spark Ignition RV water heaters, SF and SFQ Model Furnaces are equipped with a dual solenoid gas control valve. These valves are currently supplied to Suburban by two separate vendors; White Rodgers and Seven Universe. The solenoids used on these valves will be available as a separate replacement solenoid kit. These kits will be available as warranty replacement parts and for general stocking purposes.

DSI WATER HEATERS

- White Rodgers Solenoid Kit part number 521072
- Seven Universe Solenoid Kit part number 521073

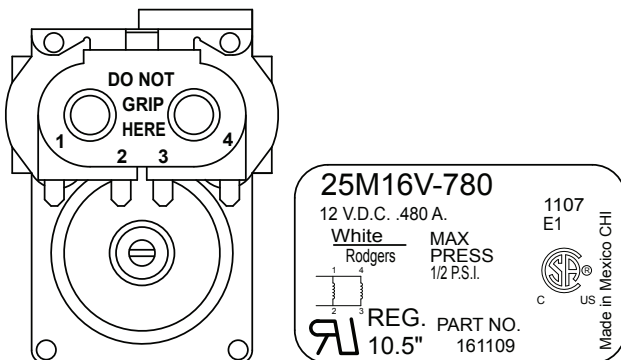

SF and SFQ Furnaces

- White Rodgers Solenoid Kit part number 521074
- Seven Universe Solenoid Kit part number 521075

PLEASE NOTE: The solenoids are not interchangeable or compatible between the two suppliers. A White Rodgers Solenoid kit can not be installed onto a Seven Universe gas valve and a Seven Universe solenoid kit can not be used on a White Rodgers gas valve. Proper identification of the gas valve by its manufacturer is of vital importance when ordering one of these replacement solenoid kits. Below is a description of how to identify the valve being serviced to ensure that the correct replacement solenoid kit is being ordered.

WHITE RODGERS

White Rodgers Corporate Logo is printed on the Part I.D. label located on the front of the solenoids metal cover. The solenoids are installed to be arranged in line with the valve body.

SEVEN UNIVERSE

Seven Universe Corporate Logo is printed on the Part I.D. label located on the front of the solenoids metal cover as well as being embossed onto the top of the valve body. The Solenoids are installed to be arranged in an outward position to the valve body.
