

BMW ANGLE EYE HEADLIGHT WIRING SCHEMATIC  
for PRE-VASCO (thru 2003) WRV ALPINE COACH

Pin Assignments in  
VEC Connectors

Viewed from Wire Side of Connector

Example: Wire # 1006L is connected  
to the VEC in the Blue (#3)  
connector at Pin A.

- Notes:
1. On my 2001 Alpine wire numbers 1006L and 1006R are visible on the wires.
  2. I could not find any markings on the wire identified as "HDL ORG" which is the wire from the headlight switch. It is a tan wire connected in the Gray (#2) connector at pin C.
